

Index for  
**J Benabou, Introduction to Bicategories**

Christian Kissig

May 15, 2009

**Table of Contents**

Part I

1. Bicategories 3
2. Examples of Bicategories 18
3. Dualities 26
4. Morphisms of Bicategories 29
5. Examples 37
  - 5.1 Functors 37
  - 5.2 Multiplicative Categories 37
  - 5.3 2-Functors 38
  - 5.4 Monads 39
  - 5.5 Polyads 43
  - 5.6 Pseudo-Functors 47
  - 5.7 Bimodules and Rings 50
  - 5.8 Functoriality of Spans and Cospans 50
6. Some Corollaries of Theorem 4.3.1 52
7. Some Basic Constructions 55
  - 7.1 Poincare Category 55
  - 7.2 Classifying Category 56
  - 7.3 Picard Groupoid 57
  - 7.4 Inverse Limits 57
8. Transformation between Morphisms 59
  - 8.1 Introduction 59
  - 8.2 Squares and Cylinders 60
  - 8.3 The Categories  $Cyl\underline{S}(U, V)$  61

- 8.4 The Functors  $c(U, V, W)$  62
- 8.5 Geometric Representation 64
- 8.6 The Associativity and Identity Morphisms 67
- 8.7 The Top and Bottom Morphisms 73
- 8.8 Superposition Morphisms 74

## **Index of Terminologies**

- 2-Categories 18
- Bimodules 21
- Locally Punctual Bicategories 43
- Multiplicative Categories 19
- Polyads 43
- Skeleton 7

## **Index of Notation**

- $\emptyset$  24
- $\mathbb{1}$  24
